Review

What we saw on the BBC TV news while all this was going on was the various meetings between Harold Wilson, his ministers and Ian Smith, who had declared independence for Rhodesia. We were unaware of what was actually taking place in the country... Hannes Wessels redresses the balance with an amazing tale of daring and courage. (Books Monthly UK)

A Handful of Hard Men is, first and foremost, an account of the actions of Rhodesian SAS throughout the brief life of that republic; Wessels has a talent for bringing the lengthy list of battles and skirmishes to life. However, his account regularly connects the events in southern Africa to the larger context, and the perceptive reader understands that the war was not lost on the battlefield: its end was the result of treachery in Washington, D.C. and London, as well as in New York at the United Nations and even within the halls of government in Salisbury, Rhodesia, where (it is alleged) agents of influence played a role in undermining the nation. The account of the SAS ends with a fading away; deprived of the opportunity to assassinate Robert Mugabe before he could assume control of the nation and transform it into the horrific slaughterhouse called Zimbabwe, the brave men of the SAS stood down. They did their duty; the loss of Rhodesia was a tragedy willed by forces beyond their control. Wessels' book is a worthy tribute to their sacrifice, and will be of benefit to all readers who desire a better comprehension of this aspect of the worldwide war against the forces of Marxism-Leninism. (New American Magazine)

Focusing on the story of Captain Darrell Watt of the Rhodesian SAS, *A Handful Of Hard Men* recounts the trials and tribulations he and his team endured while resisting the forces of Robert Mugabe and Joshua Nkomo. Their story is nothing short of mind blowing - drinking their own urine and eating used teabags to survive when resupply missions failed. It's Impossible not to marvel at the bravery and determination of these soldiers – the term 'hard men' fails to do them justice.. – (History of War)

Hannes Wessels was born in 1956 in Salisbury and grew up on the Mozambique border. He left school to become a combat soldier and saw lots of action. His book is a paean to the greatest soldier he got to know well, Captain Darrell Watt, of the Rhodesian SAS and Special Forces. Watt won all his battles but

eventually, thanks to Lord Carrington and gang, lost the war. For 12 long years in the cauldron of war Captain Watt never lost a battle, exhibiting Spartan-like bravery and better than Spartan-like ingenuity in combating far, far superior forces. The Rhodesian SAS amounted to just an incredible-to-believe 250 men. In the book Wessels recounts harrowing incidents perpetrated by Zanu and Zapu (Mugabe and Nkomo forces) soldiers on black and white civilians, and even on their own recruits... (Taki, Spectator UK)

About the Author

Hannes Wessels was born in 1956 in Salisbury, Southern Rhodesia (now Harare, Zimbabwe) but grew up in Umtali on the Mozambican border. As a boy, holidays were spent with Game Department rangers; time on safari in Mozambique with the late Wally Johnson was a big influence on him. Wessels also grew to know Robert Ruark whose love of Africa, its people, politics and the written word left a lasting impression. He saw action in the Rhodesian bush war before acquiring a law degree which he chose not to use. He has hunted big game in Mozambique, Zimbabwe, Zambia and Tanzania in a 20-year career. In 1994 he was severely gored by a wounded buffalo which almost cost him his life. While no longer directly involved in hunting, he is part-owner of a lodge and game ranch in Zambia on the Zambezi and remains keenly interested in all matters relating to African wildlife and conservation. He has published *Strange Tales from Africa* in the USA, a collection of anecdotes from his hunting days. He is also a syndicated writer for *Outdoor Life* in the United States and is currently writing a history on the Rhodesian SAS. He is married to Mandy and has two daughters, Hope and Jana, and lives in Darling in the Western Cape of South Africa.

A HANDFUL OF HARD MEN: THE SAS AND THE BATTLE FOR RHODESIA BY HANNES WESSELS PDF

During the West's great transition into the post-Colonial age, the country of Rhodesia refused to succumb quietly, and throughout the 1970s fought back almost alone against Communist-supported elements that it did not believe would deliver proper governance. During this long war many heroes emerged, but none more skillful and courageous than Captain Darrell Watt of the Rhodesian SAS, who placed himself at the tip of the spear in the deadly battle to resist the forces of Robert Mugabe and Joshua Nkomo. It is difficult to find another soldier's story to equal Watt's in terms of time spent on the field of battle and challenges faced. Even by the lofty standards of the SAS and Special Forces, one has to look far to find anyone who can match his record of resilience and valor in the face of such daunting odds and with resources so paltry. In the fight he showed himself to be a military maestro. A bush-lore genius, blessed with uncanny instincts and an unbridled determination to close with the enemy, he had no peers as a combat-tracker (and there was plenty of competition). But the Rhodesian theater was a fluid and volatile one in which he performed in almost every imaginable fighting role; as an airborne shock-trooper leading camp attacks, long range reconnaissance operator, covert urban operator, sniper, saboteur, seek-and-strike expert, and in the final stages as a key figure in mobilizing an allied army in neighboring Mozambique. After 12 years in the cauldron of war his cause slipped from beneath him, however, and Rhodesia gave way to Zimbabwe. When the guns went quiet Watt had won all his battles but lost the war. In this fascinating work we learn that in his twilight years he is now concerned with saving wildlife on a continent where they are in continued danger, devoting himself to both the fauna and African people he has cared so deeply about.

Read this book so that the world shall not forget these great warriors. Thermopylae is nothing....

By Meuwissen

One of the first things that I appreciated about this book was that it was not the Author writing about how heroic the Author was.... Even though Hannes Wessels certainly has enough material in his own life to legitimately pen such a book.

Very quickly it was apparent that Hannes was writing about men he knew and admired; in particular Darrell

Watts. The exploits of these men, set to the complex history of a gem in the African continent once known as Rhodesia.

Hannes Wessels, like so many other Rhodesians, has deep pride in the nation he was born into. The complexities of post colonial southern Africa are impossible to understand without having experienced them. This is true the world over. Domestic issues cannot be appreciated by outsiders. It is unfair to judge from the other side of the planet while sipping a mocha latte.

To quote a wise man: "Rhodesia found itself on the wrong side of history"

History will be forced to acknowledge that the abandonment of Rhodesia and her values has turned out to be one of the greatest injustices that Africa, if not the world, has ever seen.

These men fought against insurmountable odds under conditions that modern militaries have not experienced. Isolated, condemned, surrounded. Hard Men indeed.

Had the battlespace been Vietnam, Europe or the middle east, then these men would have many movies made about them.

Spartans at the Battle of Thermopylae are known as patriots fighting on their homeland. The Spartans pale in comparison with Rhodesians.

Reading about the treachery and betrayal made me sweat. Reading about Darrell Watt tracking terrorists for days made me realize I cannot call myself a soldier next to him. Long Range Patrols? Not like this...

I have learned that Darrell Watt is only one great soldier among many great soldiers, forced to step up and perform against odds that modern militaries would balk at, even with today's tech. WDW

This book gave me a thirst to learn more about Rhodesia and the bush war. Hannes Wessels has done all involved a great service.

Read, learn, investigate and reach your own informed opinion.

Nemo me impune lacessit.

Great

By purchaser

Engrossing memoir told by the men who were there - I couldn't put it down. It's amazing how the outnumbered Rhodesian soldiers won this war (militarily) against forces trained and armed by red China and the USSR, and also supported by the west (there weren't many cold war era conflicts in which both the communists and the west were essentially on the same side!). The politicians finally caved in, basically tricked by the UK, thus leading to the creation of that hotbed of human misery and death called Zimbabwe.

it is an excellent read, not to mention being a tour de ...

By believer

A most interesting book for those interested in serious special forces operations. It covers what is now a barely-known 1970s war in which a tiny force of Rhodesian Special Air Service soldiers took on, and trounced, tens of thousands of insurgents trained and armed by the Soviet Union, China and Cuba and

supported by virtually the entire Western world. Setting aside any feelings a reader might have about the rights and wrongs of a colonial remnant fighting to retain an unsustainable way of life, this book recounts a military epic. It is also a welcome change from the customary diet of special forces accounts of actions in Vietnam and the Middle East. Well written and structured, it is an excellent read, not to mention being a tour de force of what can be achieved in the face of terrible odds by a tiny number of highly skilled and totally committed soldiers.
