Be ready for Drop-D tuning if your bass can support it.

By CBHouse

Overall, very good, and I would recommend. However, a few things to know/understand before you buy.

1. Only one of these movements takes standard E-A-D-G tuning.
2. Tune to D-A-D-G. This may be an issue for you if you have a short scale bass, or a whimpy 105 E string or smaller gauge.
3. None of these are in their true key-signatures. They have truly been "adapted" to bass. That said, you can't really "play along" since you will be in the wrong key.

Again, this is GOOD. But be prepared. This probably should have been written for a 5-String Bass, but I appreciate the effort to adapt for 4-String.

Not what I needed.

By Hal Glover

It was a disappointment. Each score featured a detuning of the E string to D. I'm not a professional. I purchased to book for training. It was just not what I needed.
