You will not regret it. This soft documents book Construction Reports 1944-98 From Wiley-Blackwell could be your buddy in any case.

Review

"The tabular comparison between the reports is excellent.

A useful text for those wanting an overview of any of the featured reports and not wishing to read through the full version. One for recommendation to students and practitioners undertaking research into the future direction and prospects of the industry."

Richard Davis Msc MRICS ACI Arb, Building Engineer

'I must report that the book is exceedingly well written and readable. ...I would class this as an essential primer for any student at Masters level or at research degree level who was looking to produce any significant piece of research on virtually any aspect of our industry.

'An excellent piece of work... should be on the shelf of every serious researcher and teacher in our field.'

Construction Management and Economics October 2003.

From the Back Cover

It is often said that in order to know where we are going, we need to know where we have been. For some years the construction industry has been challenged to deliver better performance in terms of value for money, timelier construction and defect free building. Behind this remodelling of an industry is Government. The interest by Government is not new, and report after report in the post war period has exhorted the industry to perform better.

This book documents how Government, through influential reports, has sought to shape the performance and attitudes of parties to the construction industry. It provides a critical review of 12 of the most significant, setting these against their political, social and economic background, and offers a ready reference and critique for researchers of construction management, government and economics.

About the Author

Mike Murray is a lecturer in construction management within the Department of Architecture & Building Science at the University of Strathclyde. He is currently at the closing stage of his PhD research and holds a first class honours degree and MSc in construction management. He has lectured at three Scottish universities and has presented research papers at both UK and overseas conferences. Most helpful customer reviews

0 of 0 people found the following review helpful.

Just what I needed

By David R. Pierce

Prof. Langford's book provided exactly what I needed -- a review of all the British Government reports on the state of the UK construction industry since WW2. It would have been nearly impossible to obtain copies of all those reports from this side of the pond, not to mention how long it would have taken to extract the gist of each.
