CREATIVE BICYCLE DESIGN AND FRAMEBUILDING BY ED FOSTER PDF

Creative Bicycle Design and Framebuilding is for the experienced craftsman interested in making steel bicycle frames and forks in a small shop, or well-equipped home studio. It covers aspects of the design process, including creativity, and bicycle geometry. Tools and equipment are discussed, and the process of building bicycle frames is illustrated. This book conveys a functional understanding of bicycle frame construction, allowing the builder to advance toward building bicycle frames by using his own method, rather than by copying how somebody else does it.

The Ultimate Frame Design and Build Guide!

By Flyincat

This is a FABULOUS manual that will enable you to build, from the ground up, a perfect bicycle frame that fits you, and is designed for your body proportions. There are a large number of charts and graphs, dealing with all the different angles rrequired to come up with a bicycle frame and fork combination that is the ultimate in stability, maneuverability, and style for what YOU want. Much of the information here has been compiled and published for the first time, and is not available anywhere else.

Ed Foster has been building bikes for years, ranging from appocolyptic survival bikes, to customer racers, to duplicates of bicycles from the 1890's.

His work has been widely displayed and collected, and even a superficial examination of one of his bikes shows his engineering skill and craftsmanship. He was the founder of "La Suprema" handcrafted bikes in Tucson, Arizona.

I would recommend adding additional design books with it

By Greg Trim

Interesting, there is a lot of information in this publication. I would recommend adding additional design books with it.
